Leave for 5-30 mins depending on level of soiling4. Remove loose deposit with scourer or brush. <p>Fryer Cleaning</p> <ol style="list-style-type: none">1. Drain oil and close valve2. Fill 10 L water and 1 L Suma D93. Bring to controlled boil for 15-30 mins4. After cooling and draining, scrub remaining residues from side walls with scourer or brush.
Substitute:	Caustic Soda (Cancerous Material, banned by PFA) also corrodes the surface of the cooking utensil hence reducing its life.
Benefits:	Food grade chemical. Carbon built up causes uneven distribution of heat on the cooking utensil/equipment affecting the quality of food (food being under or over cooked). Secondly carbon also affects the taste of the food item. Use of D9 on cooking equipment ensures maintenance of food quality.
